

HELPING MICHIGAN SAVE ENERGY. THAT'S OUR PROMISE.

ABOUT PREFERRED CONTRACTORS

The Consumers Energy Preferred Contractor program helps you find contractors that are active and familiar with the residential energy efficiency programs offered by Consumers Energy.

Contractors are ranked based on:

- Number of applications submitted
- Results from customer satisfaction survey
- Record of following application procedures
- Completion of training sessions

GOLD LEVEL

Gold Level contractors are top performers in Consumers Energy programs, completing high volumes of projects each year and scoring very highly with customers.

SILVER LEVEL

Silver Level contractors perform many projects annually and receive high customer satisfaction scores.

BRONZE LEVEL

Bronze Level contractors contribute a smaller volume of projects to the program than Gold Level or Silver Level contractors but score well enough with customers for distinction in the program.

ENERGY AUDITOR

These contractors perform high-quality home performance inspections and recommend energy-efficient improvements but do not typically install equipment.

Contractor rankings are updated annually. Search results on each page will be prioritized with higher ranking contractors showing first, based on services requested. Contractor rankings are in no way an endorsement of the work or performance of the contractors you may choose to hire. See program-specific terms and conditions for more details.
